

Signatu SPIN

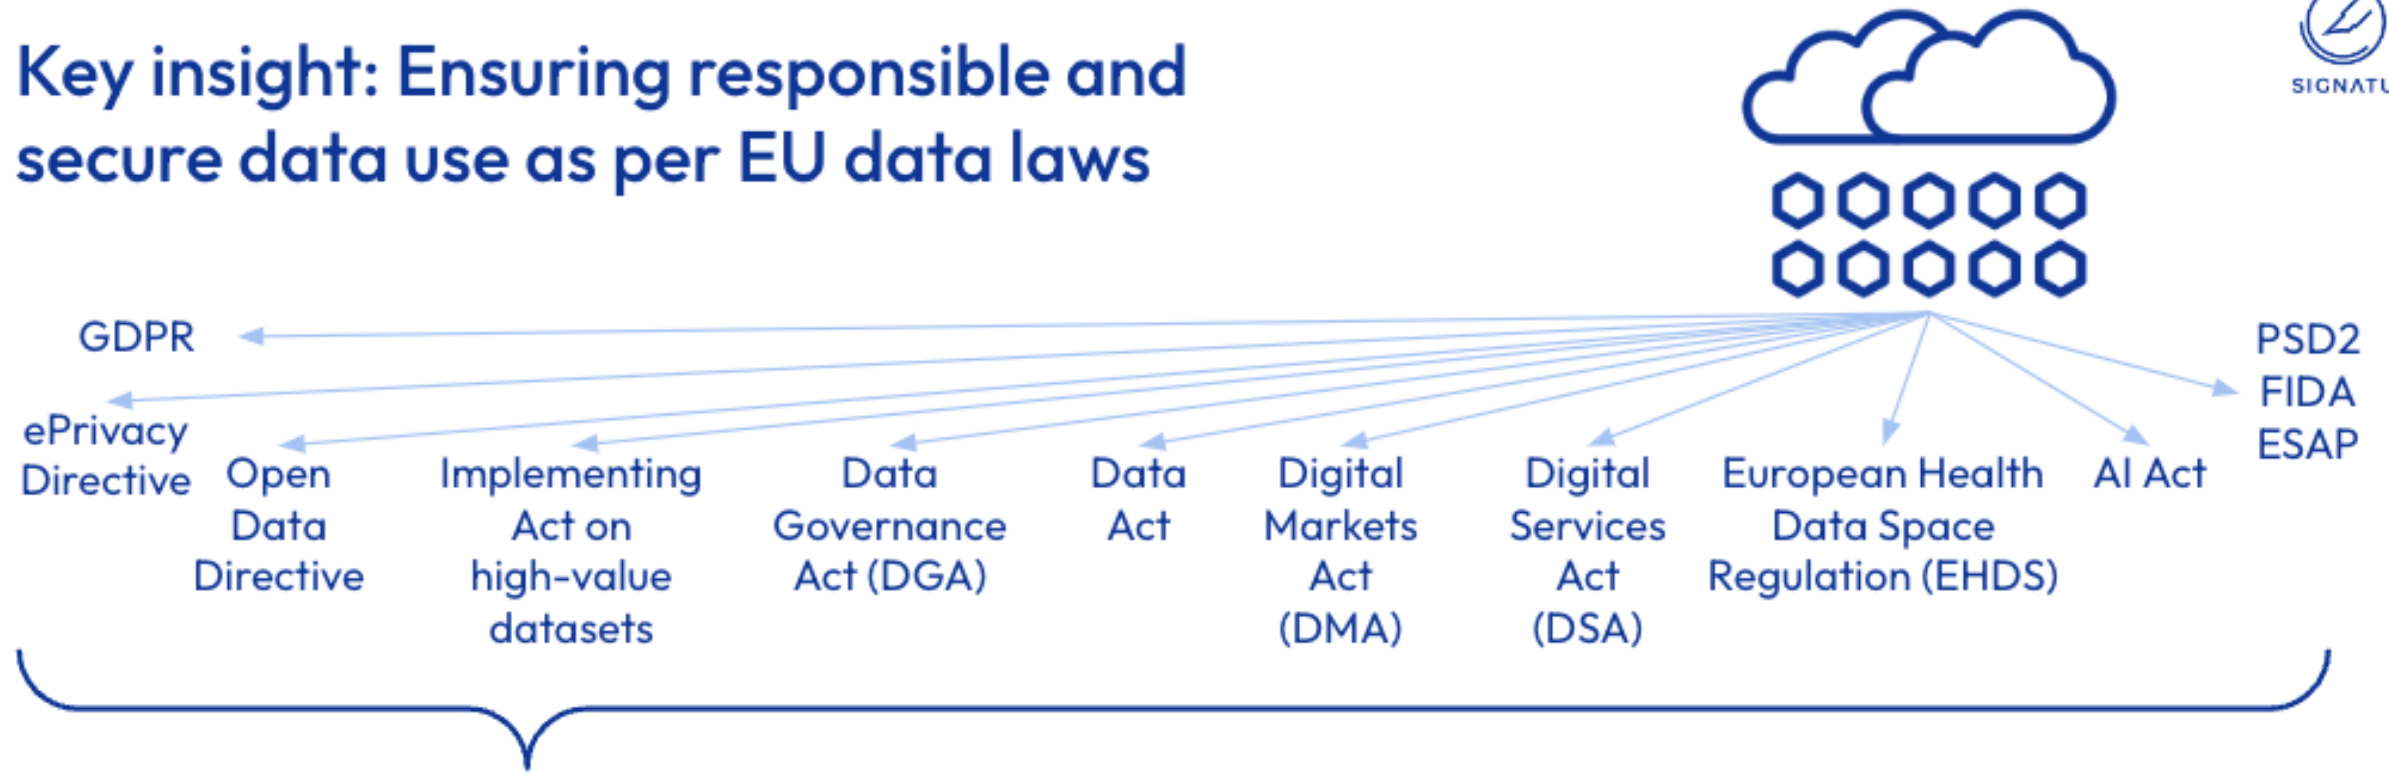

Signatu SPIN

Signatu SPIN is a structured repository of your data processing that powers all your data compliance needs. SPIN builds on many years of research and development.

Key insight: Ensuring responsible and secure data use as per EU data laws

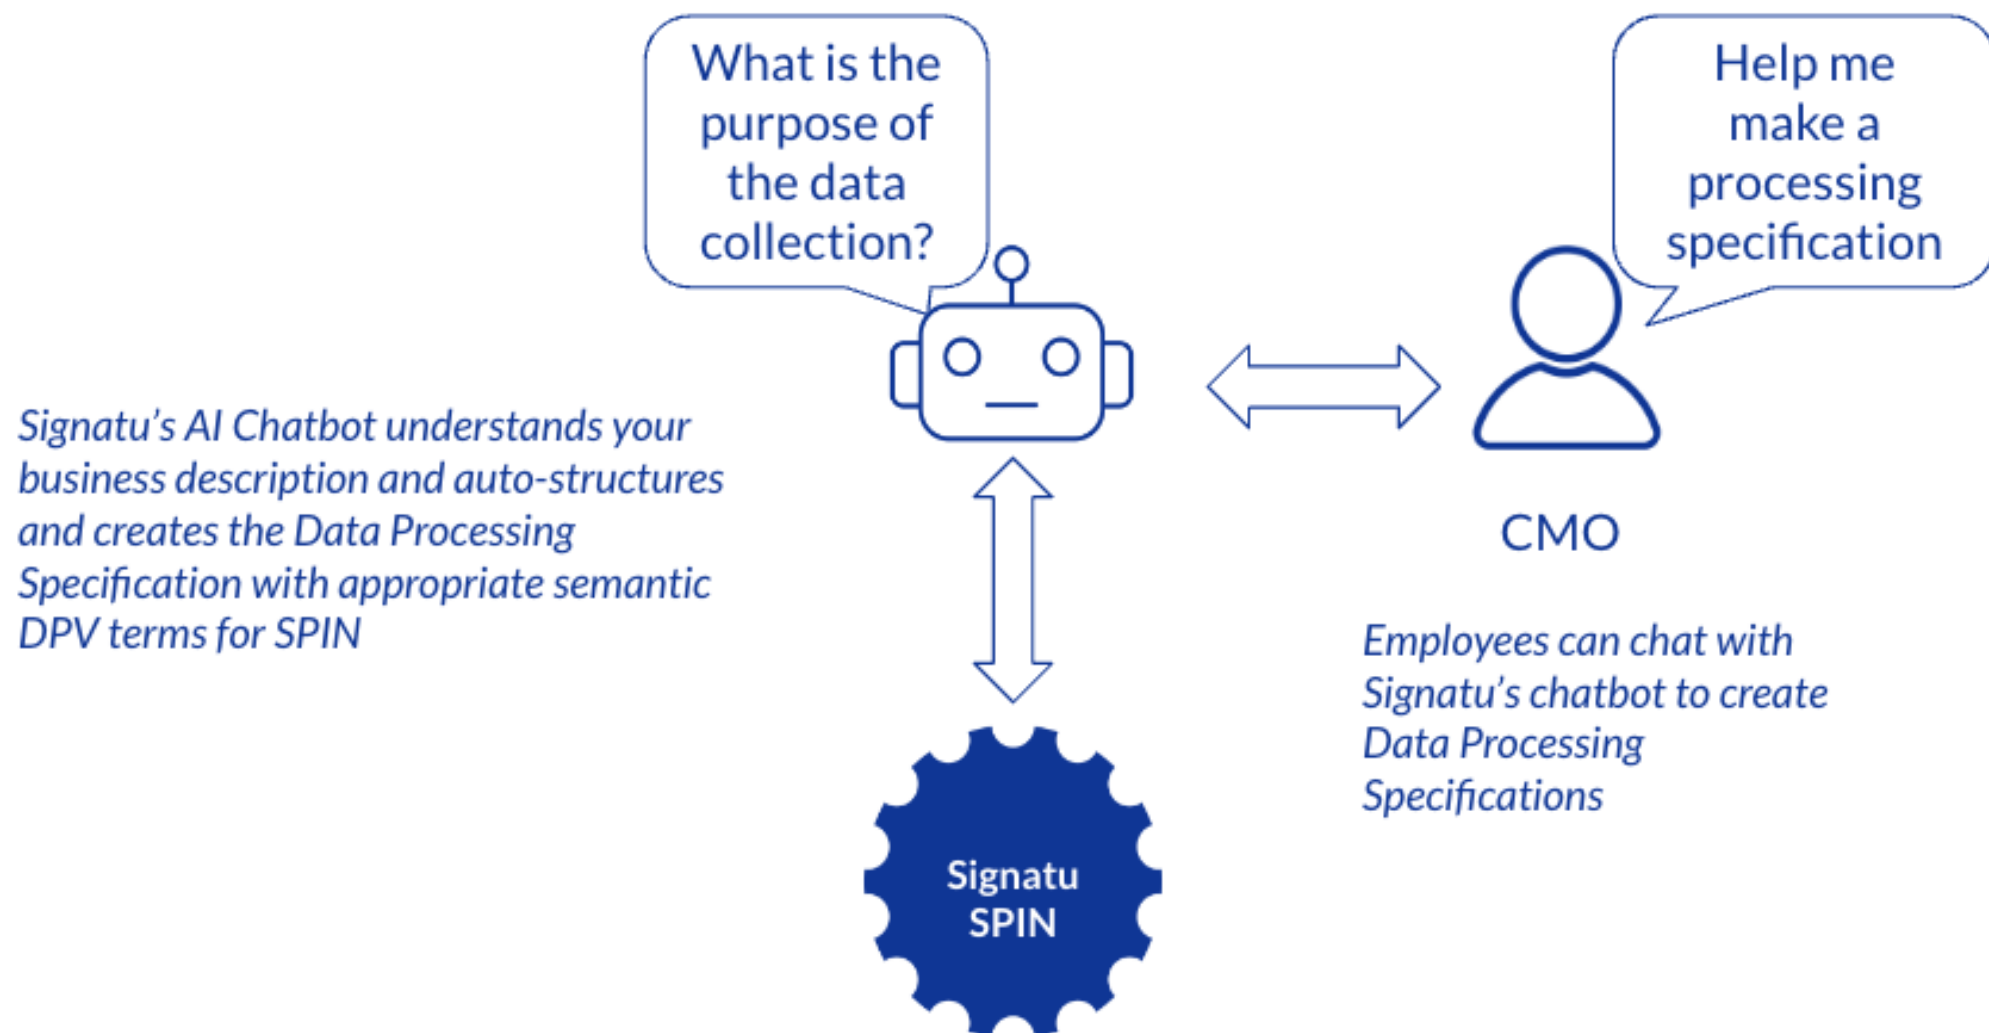

Challenge: What if all EU data laws were unified in an AI database to reduce repetition? This would help businesses streamline documents, processes, and communications such as consent requests and data sharing agreements. This could also enhance solutions for EU Data Spaces.

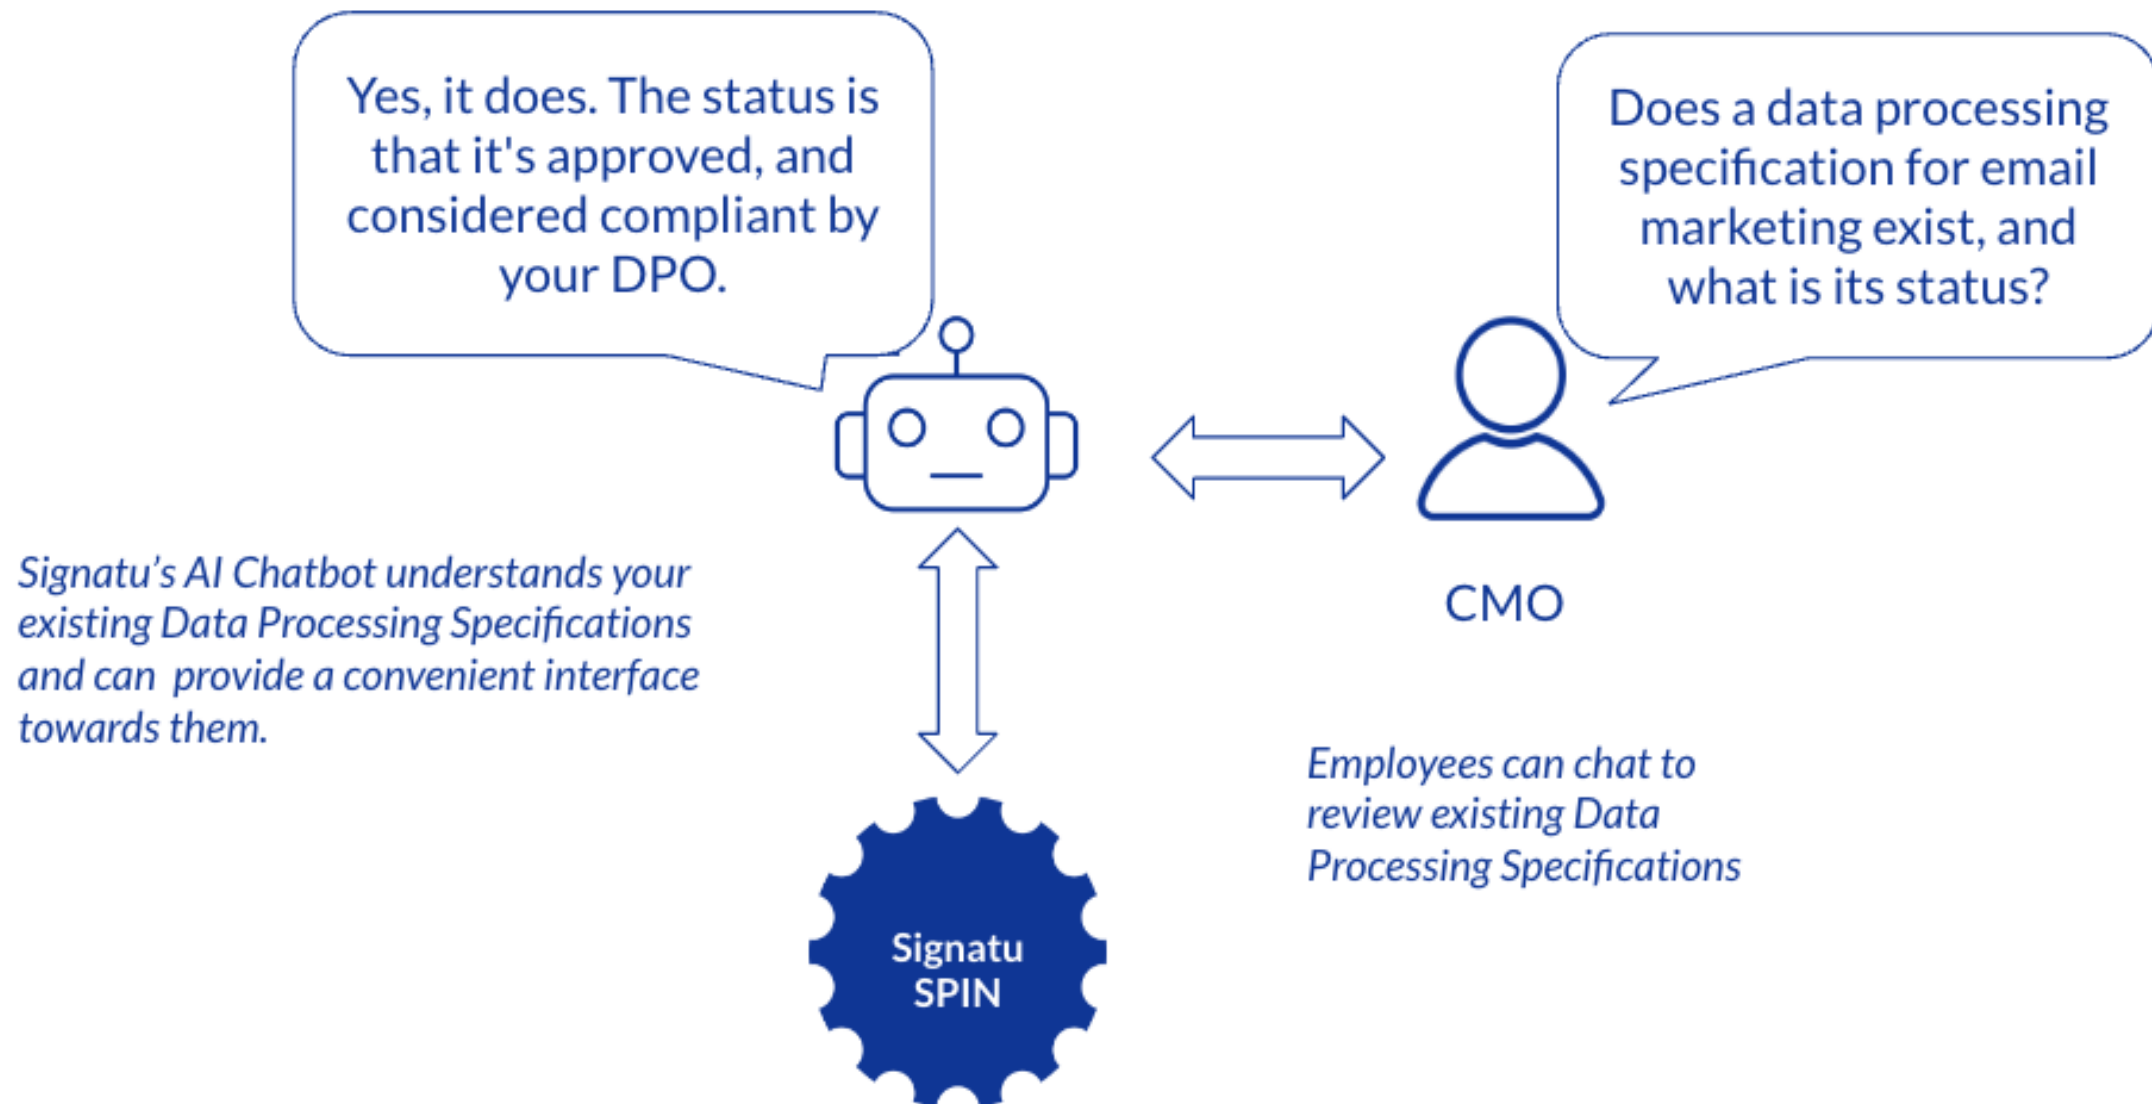

Signatu addresses this challenge with an innovative solution: A unique legal database with standard, machine-readable, interoperable legal information, augmented by AI. This tool helps ensure compliance by verifying information, creating documents, and more.

SPIN: AI Chatbot

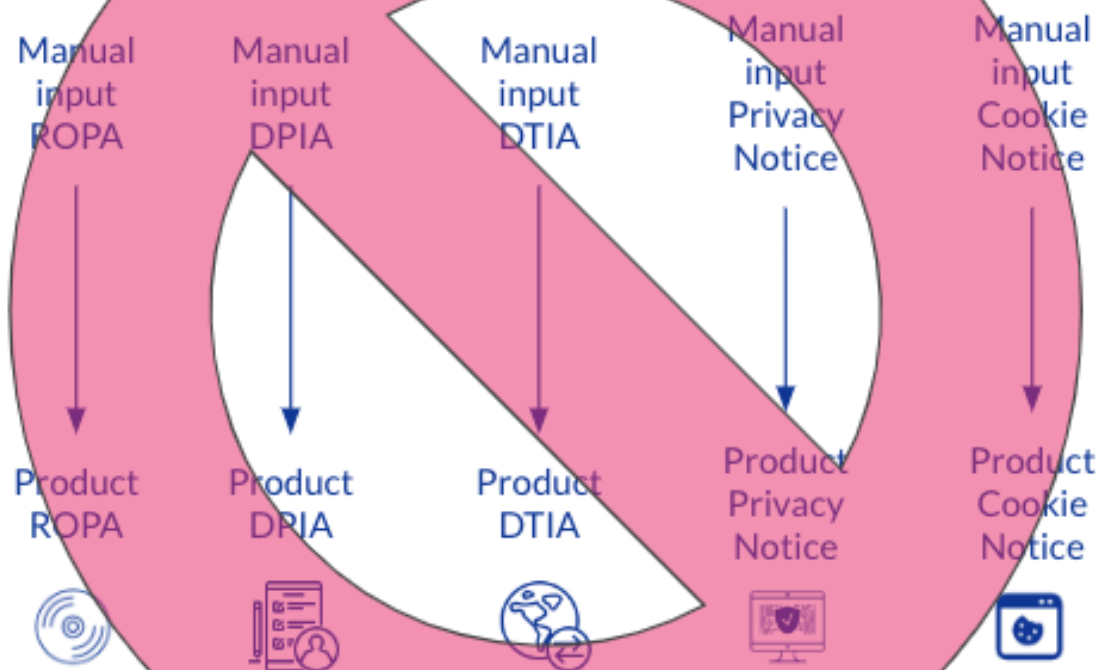

SPIN AI: review

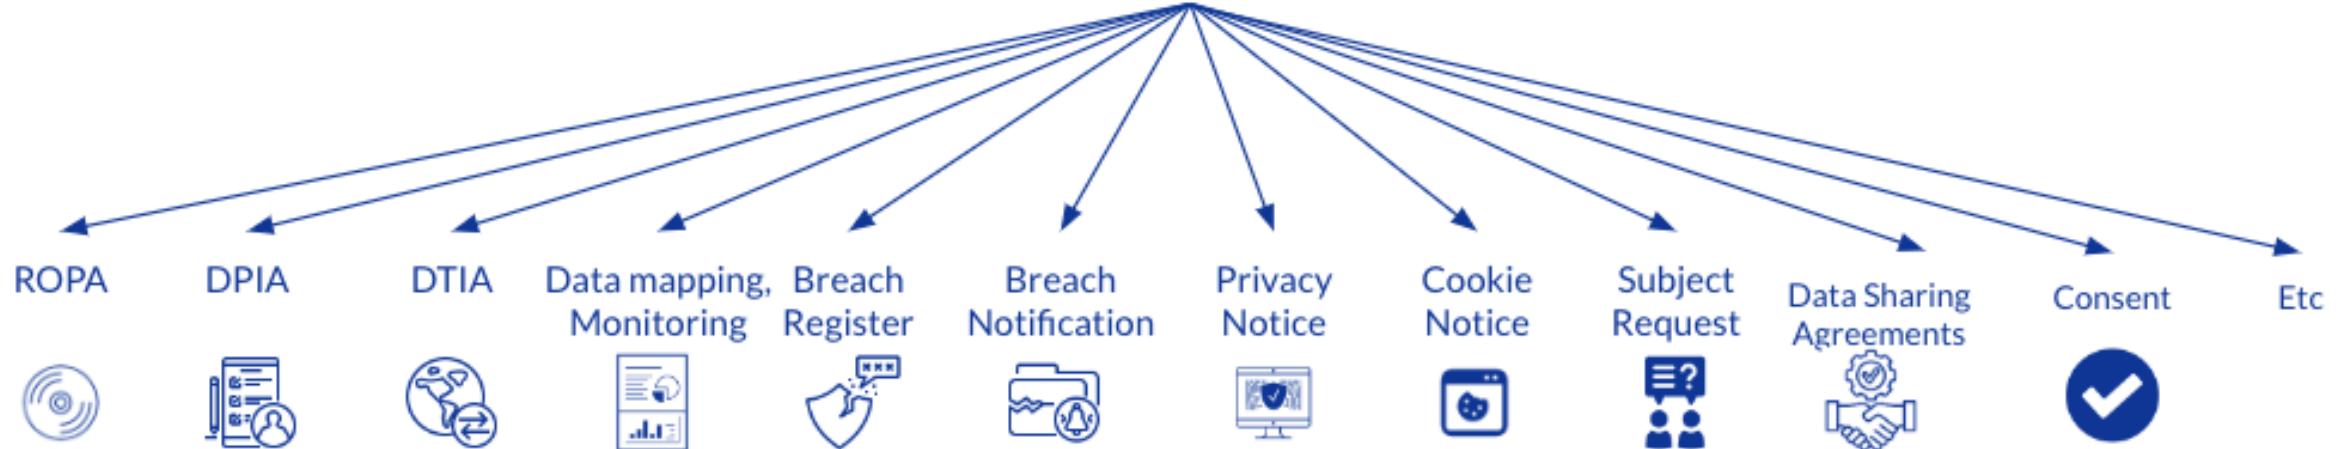

SPIN: compliance documents

Before: same work over and over

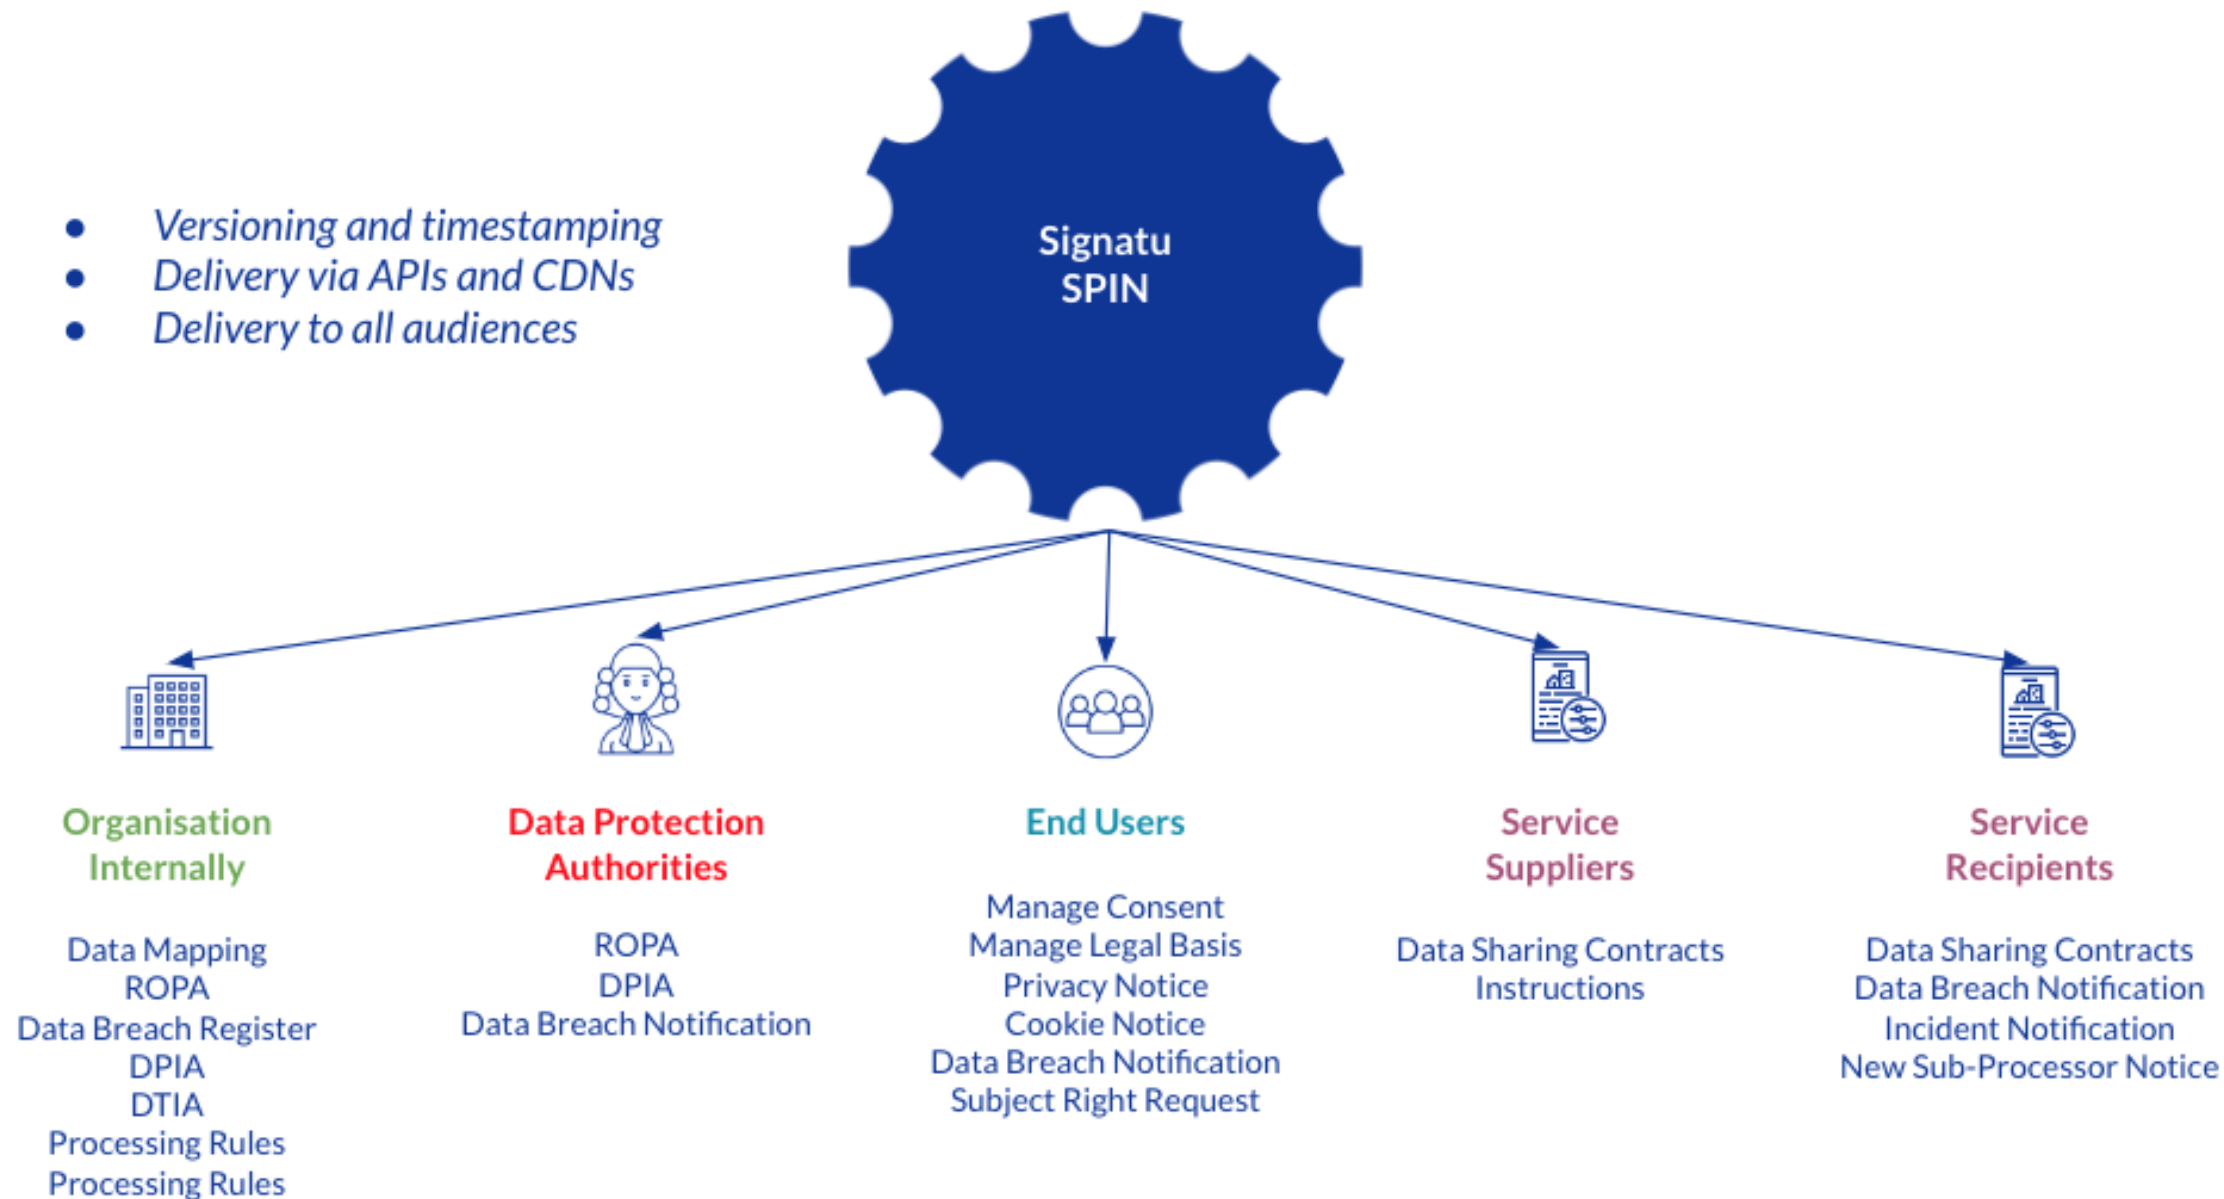

SPIN: automatic compliance documentation

*Data Processing Specifications
powers all compliance
documentation*

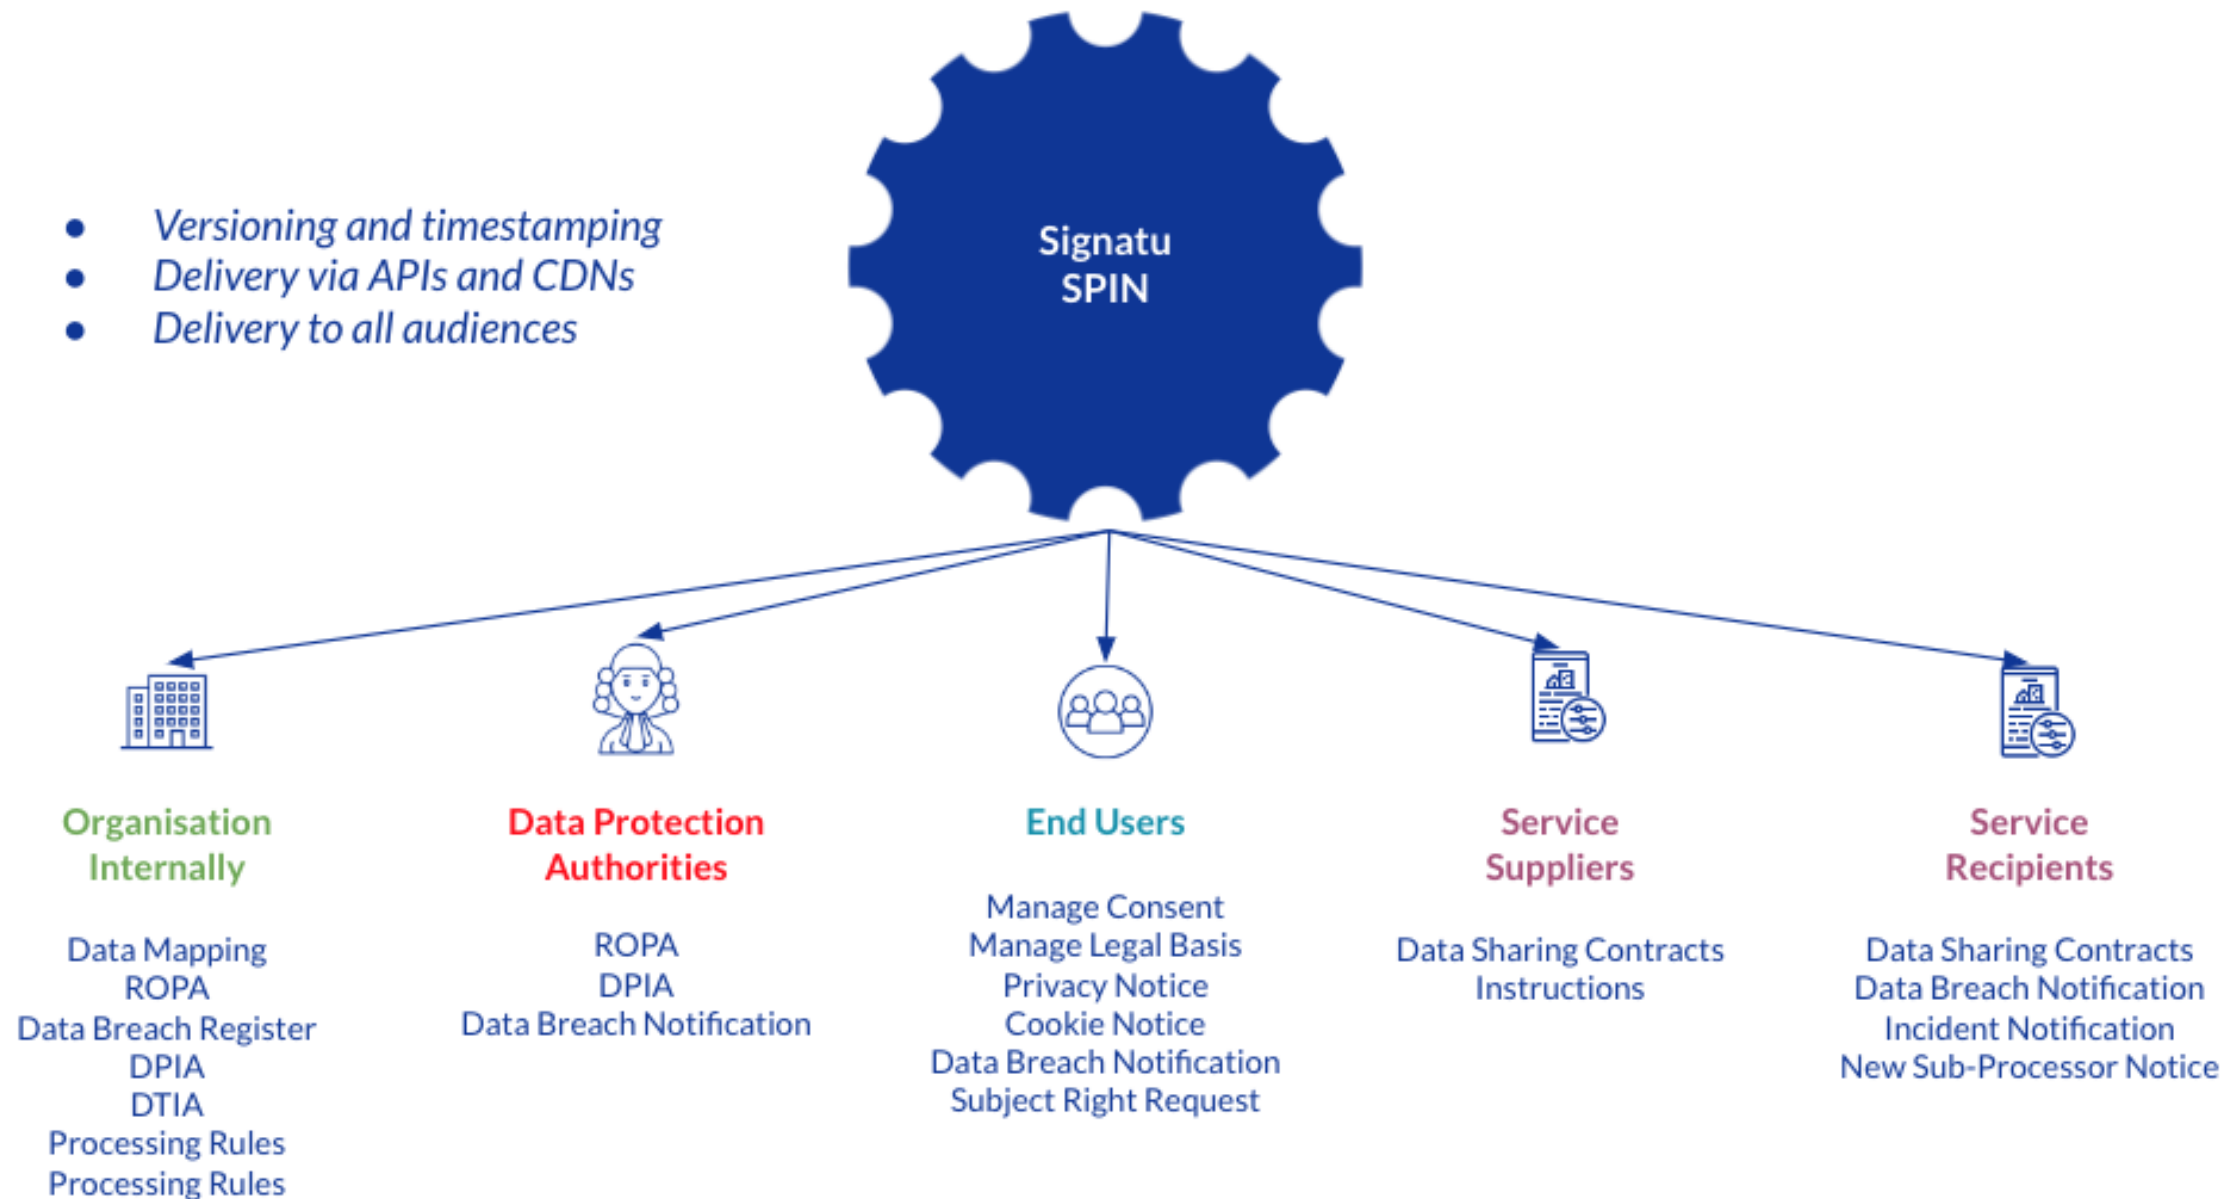

SPIN: delivery of documents

- *Versioning and timestamping*
- *Delivery via APIs and CDNs*
- *Delivery to all audiences*

SPIN: delivery of documents

- *Versioning and timestamping*
- *Delivery via APIs and CDNs*
- *Delivery to all audiences*

ROPA-March 15, 2024

I will help you create a Records of Processing Activities (ROPA) for the Data Processing Group SPIN AI. Do you have any additional instructions before we begin?

[Make a Ropa for Marketing Data Processing.](#)

Records of Processing Activities (ROPA)
